### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 102***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hurtig et al., Davis, EP 0803288 or WO 95/12117.

See the appropriate paragraph of paper 4.

***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 2-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hurtig et al., Davis, EP 0803288 or WO 95/12117.

See the appropriate paragraph of paper 4.

***Response to Arguments***

Applicant's arguments filed 6/12/02 have been fully considered but they are not persuasive.

Applicants state claim 1 is directed to a gimbaled actuator that applies uniform pressure to a bladder where the bladder is disposed on a test strip. These arguments are not commensurate in scope with the instant claim language because it does not include a test strip.

Applicants state the cited prior art fails to compress a reservoir in combination with a test strip. The instant claim language does not include limitations to a

Art Unit: 1743

combination with a test strip. However, the Office maintains all of the cited references teach a compressible reservoir in combination with a test strip. Specifically, Applicant states the prior art devices use "fingers" to compress the bladder rather than the claimed "gimbaled actuator". The Office has read the containers that are being pressed by the users fingers as the claimed gimbaled actuator.

Applicants state the prior art fails to teach application of constant even pressure across the compressible member. This definition of a gimbaled actuator is not claimed and the definition found in the specification is consistent with the cited prior art.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
